Medical, ionising radiation (e.g. x-ray equipment, r.a. sources, radionuclides)								
2 Medical, non ionising radiation (e.g. lasers, MRI, Ultrasound, UV)								
3 NORM (e.g, radon/thoron, proces industry)								
4 Non-ionizing: UV								
5 Non-ionizing: high freq/lowfreq EMV								
6 Nuclear energy / industry								
7 Consumer products emitting radiation, containing radioactivity or contaminated with radioactive material								
8 General exposure, cross cutting issues, source independent issues								
9 Cosmic radiation (e.g. journey to Mars, other ESA topics, etc.)
